1 Executive Summary

The Washington State Mercury-Containing Lights Product Stewardship Program, called LightRecycle Washington (the “Program” or “LRW”) began on January 1, 2015 for the collection and recycling of mercury-containing lights sold at retail.

Washington State residents and businesses can recycle up to 10 mercury-containing lights per day for free, by dropping them off at authorized collection sites throughout the State. Collection sites are required in every county and every city of 10,000 or more people. LRW continues to meet this requirement through its established collection network of over 200 registered sites, and by holding collection events in areas where no permanent collection site exists. Collectors include retailers, municipal waste facilities and residential curbside collection.

Collected lights are transported to the Program processor (recycler) using ground transport, where they are recycled as Universal Waste. Recovered mercury is retorted then reused or stored, and is managed by the processor in compliance with applicable local, state, and federal laws. Recycling mercury-containing lights protects the environment and human health by reducing the release of mercury into the environment and by recovering recyclables such as metals and glass.

The total amount of mercury containing lamps collected in 2017 was 614,943 lbs., estimated to be 1,317,790 units. This volume represents approximately 110.2% of the annual collection target of 1,196,024 units, as committed to in the Program Plan Update submitted on January 1, 2017.

Advertising and promotion included print, radio and digital ad campaigns, as well as promotions at fairs and festivals and light collection events. Collection sites and retailers were also sent printed marketing materials.

The Program is funded through an Environmental Handling Charge (EHC) added to the purchase price of each mercury-containing light sold at retail in or into Washington State. The EHC was \$0.25 per unit for all program product types from the start of the program until June 30, 2017. On July 1, 2017, the EHC was increased to \$0.50 per unit for all program product types. Due to declining sales volumes of mercury lights, particularly CFLs, the EHC was increased to keep the program financially viable, and the increase was approved by the Department of Ecology. The Program is administered by PCA Product Stewardship (PCA), a 501(c)(3) non-profit organization. Greater details about the Program are contained in the report below.

2 Program Description

The Program has been developed pursuant to the provisions of Chapter 70.275 of the Revised Code of Washington ([Chapter 70.275 RCW](#)) “Mercury-containing lights-proper disposal” (the “Law”). This Plan complies with the requirements of the “Rule” prescribed in (Chapter 173-910 Washington Administrative Code ([Chapter 173-910 WAC](#))) where there is no conflict with the requirements of Chapter 70.275 RCW.

The Law requires that the Program be funded through an EHC added to the purchase price of each Mercury-containing light sold at retail in or into Washington State as of the program start date, January 1, 2015. The EHC was \$0.25 per unit for all program product types from the start of the program until June 30, 2017. On July 1, 2017, the EHC was increased to \$0.50 per unit for all program product types.

Every Producer of mercury-containing lights sold in or into Washington State for retail sale must participate in a product stewardship program for those products. Participation in LRW is open to all Producers.

A network of collection sites has been established throughout Washington State that includes retailers, municipal waste facilities, collection events, and residential curbside collection. Washington State residents and businesses can recycle up to 10 mercury-containing lights per day for free, by dropping them off at authorized collection sites throughout the State.

Collected lights are transported to the Program processor (recycler) using ground transport, where they are recycled as Universal Waste. Recovered mercury is retorted then reused or stored, and is managed by the processor in compliance with applicable local, state, and federal laws.

LRW is administered by PCA, a 501(c)(3) non-profit organization.

3 Participating Producers

PCA Product Stewardship Inc. (PCA) has been designated as the Stewardship Organization for LRW. PCA administers the Program on behalf of all participating producers who sell mercury-containing lamps in or into Washington State.

PCA is a not-for-profit product stewardship organization incorporated in Oregon and registered in Washington (UBI number 603 226 459).

The participating producers in LRW are listed in Appendix A, along with their contact information and the associated brands they sell. Two producers left the Program in 2017; Casio America, Inc. and Havells USA.

The total number of mercury-containing lights sold at retail in or into the state by participating producers in 2017, as reported by Program producers and remitting retailers, is provided in Table 1 below, by product category.

Table 1: Mercury-lights Sold at Retail in WA in 2017

Product Category	2017 Units Sold
Compact Fluorescent Lamps (CFL)	1,188,003
Fluorescent Tubes (All Lengths and Shapes)	1,706,779
High Intensity Discharge (HID)	93,854
Total	2,988,636

The total number of mercury-containing lights sold at retail in or into the state by participating producers in 2016 was 5,473,032, so the 2017 sales represent a 45% decline in sales. This decline is attributed mainly to the transition to other lighting technologies, such as Light Emitting Diodes (LEDs), especially prominent in the CFL category. As a result of the steep decline in sales, the Program increased the EHC to ensure ongoing financial viability.

4 Program Goals

To estimate the number of Program Products to be collected from 2016 - 2020, PCA used the 2015 actual collection data (as reported in the 2015 LightRecycle Washington Annual Report), as a baseline. As outlined in the Program Plan Update dated January 1, 2017, PCA established a collection goal of increasing collection by 10% annually. Table 2 below outlines the revised collection targets from 2016 – 2020, and the 2017 target is 1,196,024 units.

Table 2: 2016 - 2020 Collection Targets

Revised Targets	2015 Actual	2016	2017	2018	2019	2020
Total units collected	988,449	1,087,294	1,196,024	1,315,626	1,447,189	1,591,908
Annual Increase		10%	10%	10%	10%	10%

The amount of materials collected at registered collection sites and received by the Program processor in 2017 was 622,227 lbs. This weight includes any non-program materials that may have entered the collection system, however does not include lamps from Puget Sound Energy (PSE), who continue to operate an independent network of collection sites for CFLs and incandescent lights.

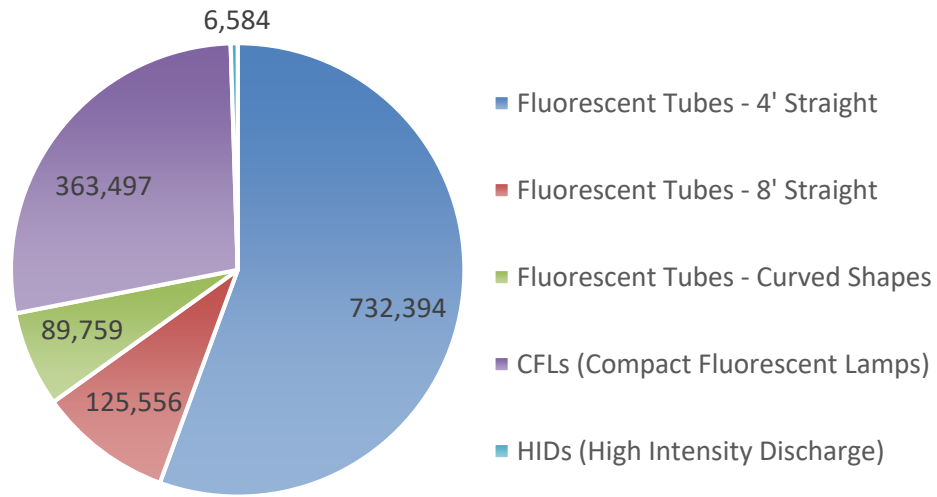

Upon receipt at the processor, each shipment is weighed. Weights are recorded separately for fluorescent tubes and mixed lamps, which are comprised of CFLs, HIDs and curved fluorescent tubes. Mixed lamps are sampled to determine the split of Program materials for those types. Weights of individual lamps were used to derive the number of units collected.

Using this method, the total amount of materials collected in 2017 was estimated at 614,943 lbs, which converts to 1,317,790 units, representing approximately 110.2% of the annual collection target of 1,196,024 units. A breakdown of the materials collected in 2017 is provided in Table 3 and the graphic below:

Table 3: Program Materials Collected and Processed in 2017

Lamp Type	Weight Collected (lbs.)	Weight per Unit (lbs.) ¹	Units Collected
Fluorescent Tubes - 4' Straight	366,197	0.5	732,394.48
Fluorescent Tubes - 8' Straight	125,556	1	125,556
Fluorescent Tubes - Curved Shapes	22,440	0.25	89,759
CFLs (Compact Fluorescent Lamps)	90,874	0.25	363,497
HIDs (High Intensity Discharge)	9,876	1.5	6,584
Total	614,943		1,317,790
2017 Annual Target			1,196,024
Percentage of Goal			110.2%

Program Materials Collected and Processed in 2017

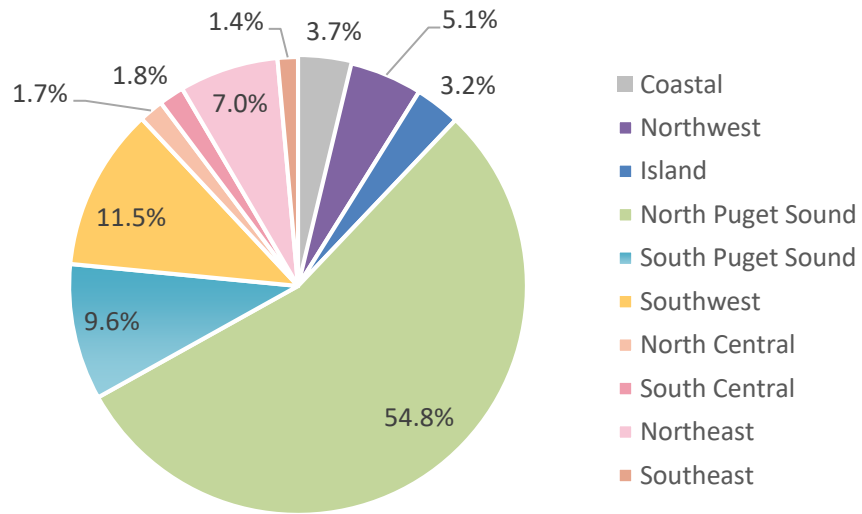

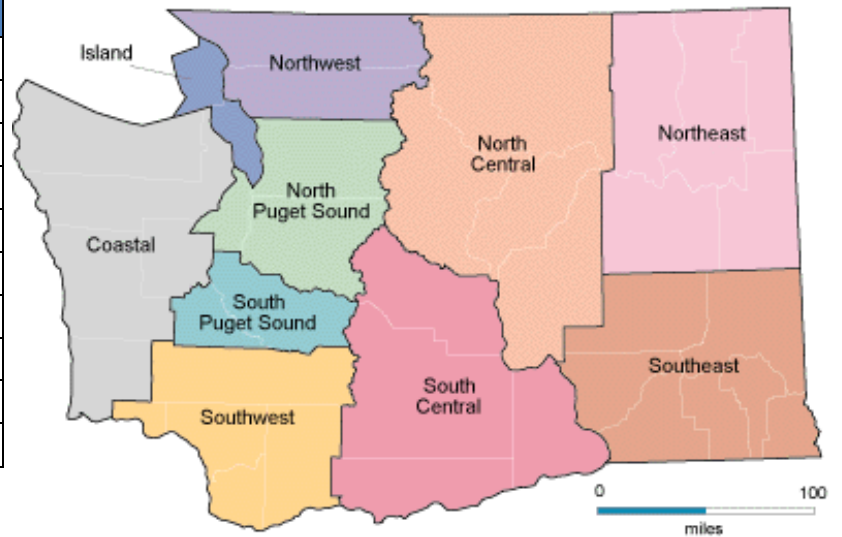

Documentation confirming collection and processing of program material is provided in Appendix B. There will be no further changes to the annual target for materials collected for 2018.

The Program tracks materials collected by region, as it was not operationally efficient or cost effective to track materials by collection site or by county. A breakdown of the estimated collections by region is provided in Table 4 below (the breakdown is estimated due to several sites that consolidate materials from multiple regions. The breakdown is based on weight, in pounds, collected).

¹ Conversion rates used as outlined in the 2017 Program Plan Update, as approved by the Department of Ecology.

Table 4: Estimated Collections by Region in 2017

Region	2017 Estimate ²
Coastal	3.7%
Northwest	5.1%
Island	3.2%
North Puget Sound	54.8%
South Puget Sound	9.6%
Southwest	11.5%
North Central	1.7%
South Central	1.8%
Northeast	7.0%
Southeast	1.4%

² Values are rounded so total is just below 100%

5 Collection System

Collection Sites

By law, collection sites are required in every county and every city of 10,000 or more people. LRW met this requirement by establishing a collection network of over 200 registered sites that collected all program products, and held collection events in areas where no permanent collection site could be placed. In three counties and four cities of 10,000 or more people, collection events were scheduled in lieu of permanent collection sites. In two cities of 10,000 or more people, awareness of collection sites in an adjacent city was raised. In both cases, multiple collection sites were available in a five-mile radius. The Washington State Department of Ecology (“Ecology”) approved a written proposal from LRW which detailed our approach to meeting collection requirements in areas without a dedicated collection site.

At the end of 2017, LRW had a total of 323 registered collection sites, including:

- 226 sites that accept all program products
- 69 sites that accept CFLs only
- 28 sites that are unadvertised, that accept all program products

Only collection sites that are advertised and accept all program products meet the collection site requirements in the law. See Appendix C for a complete list of advertised collection sites by city and county.

Unadvertised sites include:

- Sites that accumulate lights but do not collect lights directly from residents or do not want to promote the collection of lights.
- Curbside collectors whose facilities are not suitable for public drop-off of lights for recycling.

A number of collection sites in locations served by other collection sites were notified they would be required to close in 2018 in order to reduce costs in the context of the declining sales of program products. In total, 24 collection sites were notified that they would cease to be LightRecycle WA collection sites after December 31, 2017.

Curbside Collectors

Two waste haulers that have curbside collection programs for mercury-containing lights are registered as LRW collectors. The names of the waste haulers and location of their corporate headquarters are:

- Recology/CleanScapes, Issaquah, WA
- Republic Services, Bellevue, WA

Collection Events

Collection events were held to meet collection requirements in areas where no permanent collection site could be established. However, the majority of collection events that were supported by LRW were not required but were completed to provide additional convenience and maximize collection.

- Mercury-containing lights were collected at events that were held around the state that were either initiated or supported by the Program.
 - LRW and local government events
 - 10 locations, 14 days
 - 4,624 lbs. collected
 - King County Wastemobile
 - 13 locations, 163 days
 - 29,158 lbs. collected

See Appendix D for a complete list of collection events held in 2017.

E-mail Address: clorch@totalreclaim.com

Total Mercury-containing Lights Processed

LRW collected 614,943 lbs. of mercury-containing lights, all of which were processed by EcoLights.

Description of Processing Methods

Fluorescent Tubes: Fluorescent tubes are fed into a machine utilizing a controlled environment where the tubes are mechanically crushed and separated into the following components:

- Glass cullet
- Aluminum end caps
- Mercury phosphor powder

The glass cullet is sent to a Washington aggregate company for use in the manufacture of concrete. The aluminum endcaps are sold in Washington as scrap metal, and the mercury phosphor powder is shipped to an EPA regulated and approved mercury retort company in Indiana, where the mercury is removed from the powder and made available for future use in new products or processes such as the manufacture of fluorescent lamps. The clean phosphor powder is shipped for recovery of rare earth elements contained in the powder. Rare earth elements such as yttrium, europium and terbium are sometimes reclaimed from recycled fluorescent lamps. Markets for rare earth elements fluctuate, so the recovery of rare earth elements can vary.

CFLs: Compact Fluorescent Lamps are fed into a separate processing machine designed to separate the glass from the CFL base, and capture the mercury, in a controlled environment. The glass portion is then fed into our straight tube processing machine and the bases are sent to a Washington-based electronics recycling company.

HIDs: High Intensity Discharge lamps are dismantled by hand or by machine. The outer glass envelope is removed, crushed and sent with other lamp glass to an aggregate company for use in concrete, the metal frame is sent to metal recyclers, and the mercury bearing glass ampules are sent to the same mercury retort for recovery of the mercury for use in new products or processes.

Other: Other types of lamps (U-tubes, circular, neon tubes, etc.) are processed in EcoLights straight tube recycling equipment, with components separated in the same manner into commodities to allow for further recycling.

Environmental Health and Safety

EcoLights processing equipment is equipped with pleated filters, HEPA filters, and sulfur impregnated carbon beds to capture dust and mercury vapor before the process air is returned to the processing room. The lamp processing room is also equipped with additional ventilation equipment designed to capture fugitive mercury that operates 24 hours per day. The building is not vented to the outside environment.

All technicians working in the lamp processing room are equipped with full face respirators designed to capture mercury and protect the employees. They also are equipped with personal protective equipment, including coveralls, steel toed boots, gloves and hairnets to minimize exposure to fugitive mercury in the processing room. All technicians undergo urine testing at hire to establish a baseline and every 6 months to ensure safe levels are maintained.

Transportation

Transportation is completed by these two methods:

1. Direct Dispatch – Collection sites contact EcoLights directly and pick-ups are scheduled to be completed by EcoLights or their parent company, Total Reclaim, or a third-party hauler.
2. FedEx – Box kits are sent out and returned via Fed-ex.

Compliance Audit Report

EcoLights Northwest has provided PCA with a Compliance Audit Report completed by a qualified third party that satisfies all the requirements of WAC 173-910-430 (6). The Compliance Audit Report has been submitted by PCA to Ecology.

EcoLights has not received any financial penalties, regulatory orders, or violations regarding the processing of lamps over the last three years.

7 Education and Outreach

Advertising and Promotion Completed

Advertising and promotion included print, radio and digital ad campaigns, as well as promotions at fairs and festivals and light collection events. Collection sites and retailers were also sent printed marketing materials.

- Digital ad performance: Approximately 1.6 million impressions
 - Ads were displayed on:
 - spokesman.com
 - bellinghamherald.com
- Search engine ads were placed on Google and Bing to direct consumers to the website resulting in 77,000 impressions.
- Radio ad campaigns were completed primarily in Western and Central Washington where the broadcast does not reach out of state. The campaigns used a combination of 30-second informational spots and live “sponsorship mentions”, in which the on-air personality tells the audience that LRW has sponsored a portion of the programming. Spanish Radio stations were included to reach a larger audience. The following stations were used:
 - KIRO “News – Talk”
 - KOMO “News Radio”

- Print campaigns were completed using half-page newspaper ads that ran once or twice per week. Campaigns ran at various times, beginning in April and ending in September. The following major, regional newspapers were used:
 - The Spokesman Review (Eastern WA)
 - The Tri-city Herald (Tri-cities area and central WA)
 - The Columbian (Southwestern WA)

- Additional print ads were run in select newspapers to raise awareness of collection events or local collection sites as needed

- Social media consisted of posts on Facebook to promote the program and collection events. Facebook statistics included:
 - 99 posts made in 2017
 - An average of 23 engagements (likes, comments, shares and link clicks) per post
 - 29% growth in page Likes between January 1 and December 31

- Spanish language radio and print advertising campaigns were completed through these advertising media outlets:
 - Radio: 30-second informational spots in central and south central Washington
 - KWLN radio (Wenatchee, WA)
 - KDNA radio (Yakima, WA)
 - Print: Half-page ads
 - Newspapers: Published every other week in April, May, September and October
 - Tu Decides (Kennewick, WA)
 - Periodical: Published annually:
 - Eco-Logica (Mountlake Terrace, WA)

- Branded promotional items were distributed at approximately 15 fairs and festivals around the state, such as:
 - Spokane County Interstate Fair
 - City of Vancouver Recycled Arts Festival
 - Port Townsend All County Picnic

- In addition to 5" x 8" information cards, these LRW-branded, promotional items were distributed:
 - 1,200 sunglasses, made with recycled plastic
 - 1,250 clips

- Printed marketing materials
 - Information cards (5" x 8") were provided to retailers, local governments and others.
 - Collection site posters were provided upon request.
 - Printed marketing materials can be ordered by phone, email or through the website and are provided at no charge.

Examples of marketing materials and advertisements used by the Program in 2017 are provided in Appendix E.

Participant Outreach

Program participants are the producers, distributors and retailers who collect and remit the EHC. On July 1, 2017, the EHC was increased to \$0.50 per unit for all program product types. Advance notice was provided to all program participants to inform them of the EHC increase. An email notice was sent and posted on the Program reporting website 3 months in advance of the increase, and a letter was mailed to all retailers in Washington State that the Program has listed on file one month in advance of the increase.

Assessment of Effectiveness

Advertising was designed primarily to create awareness of the program, drive the audience to the website and specifically to the collection site finder. However, the effectiveness of LRW outreach efforts cannot be gauged solely by the amount of website traffic or materials collected. Other factors such as the cumulative impact of advertising and outreach efforts in previous years can impact collection volumes. The long lifespan of program products also means that program use does not necessarily immediately follow a gain in program awareness.

8 Financial Report

The Program is funded through an EHC added to the purchase price of each mercury-containing light sold at retail in or into Washington State. The EHC was \$0.25 per unit for all program product types from the start of the program until June 30, 2017. On July 1, 2017, the EHC was increased to \$0.50 per unit for all program product types. Due to declining sales volumes of mercury lights, particularly CFLs, the EHC was increased to keep the program financially viable, and the increase was approved by the Department of Ecology.

A breakdown of the revenue generated by the Program in 2017, as well as expenses for Program operations, communications, and administration is provided in Table 5.

Table 5 Program Financial Summary for 2017

Description	2017 Total Actuals
Light Revenue	\$ 1,030,570
Retailer Offset	\$ (17,034)
Total Revenue	\$ 1,013,535
Program Expenses	\$ 987,688
Other Expenses	
Communication	\$ 103,524
Administration	\$ 95,088
Regulatory	\$ 105,503
Total Other Expenses	\$ 304,115
Total Expenses	\$ 1,291,803
Increase/(Decrease) in Net Assets	\$ (278,267)
Net Assets, beginning of year	\$ 638,893
Net Assets, end of year	\$ 360,626

An independent financial audit was not conducted for the 2017 financial statements since according to the law this is required once every two years, and an audit was conducted for the 2016 financial statements.

Appendix A: Participating Producers and Brands

The following table lists the Producers who participated in LightRecycle Washington during 2017.

LightRecycle Washington Program
PCA Product Stewardship Inc.

RE: 2017 Processing Volume

Dear LightRecycle Washington:

This letter is to acknowledge that EcoLights Northwest, LLC picked up or received the following volume of used fluorescent lamps and other materials from collection sites under the LightRecycle Washington program during 2017:

- Total program material weight: 622,227 pounds

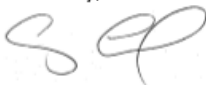

This volume includes some non-program materials, such as incandescent lamps in program containers.

Additional back-up documentation of these volumes is available.

We look forward to continuing to provide innovative lamp recycling services to PCA Product Stewardship Inc. and the residents and small businesses of Washington during the coming year.

If you have any questions, please contact me at 206-343-1247.

Sincerely,

Craig Lorch
Manager
EcoLights Northwest, LLC

Appendix C: Registered Collection Sites

The following tables list the registered LightRecycle Washington collection sites who participated in the Program during 2017. Please note, unadvertised sites have not been listed, to maintain confidentiality for those sites who wish to remain unadvertised.

Table 7: Registered Collection Sites who accept all Program Products:

#	Collection Site Name	Street Address	County	City	State	Zip	Phone
1	Othello Ace Hardware	420 E Main Street	Adams	Othello	WA	99344	(509) 488-5667
2	Asotin County Regional Landfill	2901 6th Avenue	Asotin	Clarkston	WA	99403	(509) 758-9230

Odessa	September 9	Yes	Ramm Hardware, 5 W. 1 st Ave. Odessa, WA 99159
Grant County	September 8	No	Ephrata HHW/Delano Regional Transfer Station 3803 Neva Lake Rd NW, Ephrata, WA 98823
Grant County	September 9	No	Ephrata HHW/Delano Regional Transfer Station 3803 Neva Lake Rd NW, Ephrata, WA 98823
City of Duvall	July 15	No	Holy Innocents Catholic Church 26526 NE Cherry Valley Rd, WA 98109

Appendix E: Advertising and Promotional Materials

The following images are examples of the advertising and promotional materials used by LightRecycle Washington in 2017.

Information Card, 5" x 8" Updated in 2017

Information Card Front: A vertical blue card with a recycling symbol at the top. The text reads: "RECYCLE UP TO 10 FLUORESCENT TUBES CFL or HID LIGHTS AT NO CHARGE THROUGHOUT WASHINGTON STATE". At the bottom is the LightRecycle WASHINGTON logo.

Information Card Back: A vertical blue card with a green checkmark icon at the top. The text reads: "Recycling your unwanted fluorescent tubes, CFLs and HIDs has never been easier!" followed by instructions to visit LightRecycle.org. Below is a section titled "Accepted Products" with icons for fluorescent tubes, CFLs, and HID lights. A section titled "NOT Accepted Products" with a red X icon shows icons for LED, incandescent, and halogen lights. At the bottom is the LightRecycle.org website and phone number, and the LightRecycle WASHINGTON logo.

Collection Site Posters, 11" x 17"

RECYCLE
FLUORESCENT, CFL & HID

LIGHTS

AT NO CHARGE
HERE

Recycle up to 10 lights per day!

SHREDDING + FLUORESCENT LIGHT RECYCLING EVENT

City of Bonney Lake
April 22nd | 10am - Noon

Drop your lights off for recycling during:
Parks Appreciation Day at WSU Forest
(behind Fred Meyer) 20901 SR 410

CFL

Fluorescent Tube

HID

Fluorescent tubes: Limit of 10 bulbs or tubes per person. All mercury-containing lights are accepted, including fluorescent lights, compact fluorescent (CFLs) and high intensity discharge (HID) bulbs.

Shredding: Individuals are permitted to bring up to **1 file box** or **2 grocery bags** of documents. Do not bring stiff metal, plastic bags, DVD's or other items that will jam the shredder. For more information and tips on what to shred visit the WA Attorney Generals website at atg.wa.gov
